

GK 9000 SERIES GREENHOUSE SYSTEM

COMBINING TECHNOLOGY AND TRADITION SINCE 1976

Fast, Efficient & Affordable Gutter-Connect Greenhouses

GK Machine's newly improved 9000 Series Gutter-Connect Greenhouse System uses more of your valuable and available growing space, with no land waste between greenhouses.

A gutter-connect system is more energy-efficient than stand-alone units. GK's unique gutter-connect modular framework allows you to connect two or more buildings together without changing the existing structure. Greenhouse packages include a professional greenhouse structure and the supplies required for a year-round, weather-resistant growing experience.

- The Gutter-Connect 9000 Series is the most popular form of expansion with the least amount of overall investment
- Additional houses can be added by gutter connection to an existing greenhouse
- Easy to assemble, one of the fastest assembled greenhouse trusses in the industry

The 9000 Series is available with roll-up sidewalls. All bows, posts, purlins, and wind braces are pre-punched and indexed for fast and easy assembly. An instruction manual, parts checklist, and all hardware are included with every greenhouse package.

FRAME SPECIFICATIONS

- 30' wide
- Standard spacing 5' or 6'
- 8' and 10' standard sidewall heights available
- 3 – purlin run

GK MACHINE, INC.

COMBINING TECHNOLOGY AND TRADITION SINCE 1976

GK MACHINE, INC. - Helping You Increase Efficiency!

Since 1976 GK Machine's goal has been to create value for our customers by helping solve agricultural and industrial problems by reducing labor costs and increasing productivity using state-of-art technology and CNC machining to produce equipment and steel parts of the highest quality. There's no need to take your metal fabrication and manufacturing to multiple vendors, we do it all under one roof here at GK Machine:

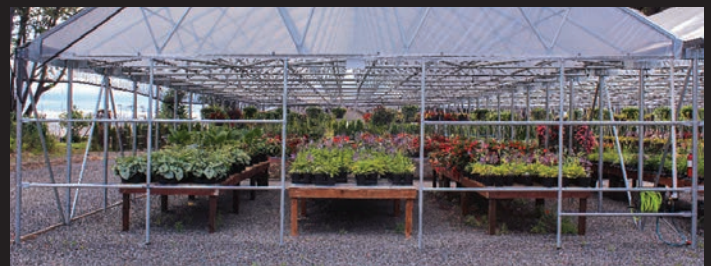

Engineering
Fabrication
Laser & Plasma Cutting
CNC Machining
Mechanical Assembly
Electric Wiring Harness
Industrial Finish & Coating
Hydraulic Manifolds
Parts & Supplies
Agricultural Repair Services

Not only does GK Machine design and build custom equipment, we also carry a complete line of agricultural equipment, manufactured in Donald, Oregon. Here are just a few of our products:

- Trailers – portable toilet trailers, shade trailers, irrigation pipe trailers, ATV dump trailers, tracking trailers, pot drop trailers and custom trailers!
- 3W6 – Swamp Buggy; high floatation for both liquid and dry system
- H9 – Tree Digger; with a variety of attachments
- Fuel Tanks – UL142 above ground storage
- Nut Equipment – Harvesters, sweeper, cart, totes, levelers and pruning towers
- Greenhouse – Houses, coverings, heaters, fans, all steel rails and base, and clamps/fittings
- Spreaders – ATV spreader, bait spreader, pull-behind spreader, PTO spreader & more!
- TR6 Sprayer – over the row sprayer

GK Machine continues to push the boundaries of possibilities and invite you to partner with us to fix, modify or automate your agricultural production or make your farming or project more efficient. Call us at 503-678-5525 or email us at gksales@gkmachine.com
